Economics Paper 1			
You do not need any other mat	erials.		Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
 - there may be more space than you need.

Information

- The total mark for this paper is 120.
- The marks for each question are shown in brackets
 - use this as a guide as to how much time to spend on each question.
- Calculators may be used.

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

Turn over ▶

Answer ALL questions. Write your answers in the spaces provided.

Some questions must be answered with a cross in a box \boxtimes . If you change your mind about an answer, put a line through the box \boxtimes and then mark your new answer with a cross \boxtimes .

1 Figure 1a represents the demand and supply of electric cars.

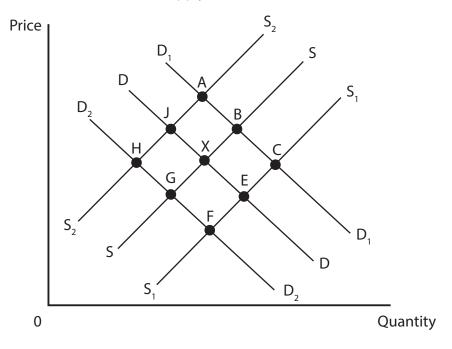

Figure 1a

(a) (i) The original equilibrium point is X. For each of the following changes, starting from X, identify the new equilibrium point in Table 1. Each letter may be used more than once.

(4)

Change	New equilibrium point
A rise in the wages of electric car production workers	
An advertising campaign for electric cars	
A fall in consumer incomes	
An increase in subsidies for electric cars and an increase in the tax on petrol cars	

Table 1

It has been estimated that the price elasticity of demand for electric cars is price elastic. (iii) An increase in the price of electric cars will therefore A increase total revenue B decrease total revenue C have no effect on total revenue (iv) Identify and explain two factors that might make the demand for a product, such as electric cars, price elastic.	(ii) Explain why the supply of copper might l	be price inelastic in the short term.
elastic. (iii) An increase in the price of electric cars will therefore A increase total revenue B decrease total revenue C have no effect on total revenue (iv) Identify and explain two factors that might make the demand for a product, such as electric cars, price elastic.	117 - 1999	(3
elastic. (iii) An increase in the price of electric cars will therefore A increase total revenue B decrease total revenue C have no effect on total revenue (iv) Identify and explain two factors that might make the demand for a product, such as electric cars, price elastic.		
elastic. (iii) An increase in the price of electric cars will therefore A increase total revenue B decrease total revenue C have no effect on total revenue (iv) Identify and explain two factors that might make the demand for a product, such as electric cars, price elastic.		
elastic. (iii) An increase in the price of electric cars will therefore A increase total revenue B decrease total revenue C have no effect on total revenue (iv) Identify and explain two factors that might make the demand for a product, such as electric cars, price elastic.		
elastic. (iii) An increase in the price of electric cars will therefore A increase total revenue B decrease total revenue C have no effect on total revenue (iv) Identify and explain two factors that might make the demand for a product, such as electric cars, price elastic.

In 2017 car production workers in the USA earned an average of \$25.58 per hour.				
	The demand for labour is more important in determining wage rates than the supply of labour. Do you agree with this statement? Explain your reasons.			
		(6)		

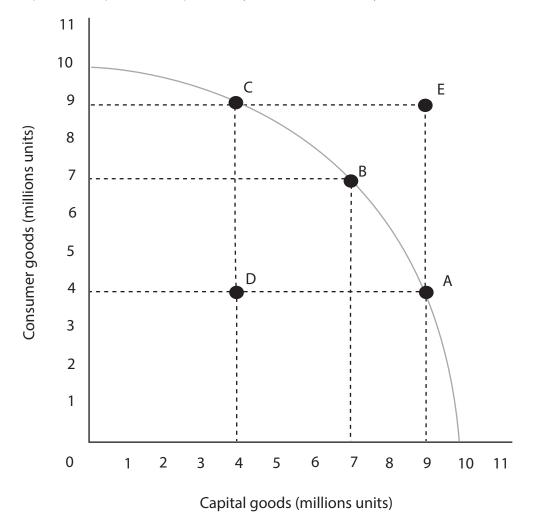

Figure 1b

- (b) (i) Which of the points, A, B, C, D or E, represents an underutilisation of resources?
 - (ii) Using the data in Figure 1b, explain what is meant by opportunity cost. (2)

(1)

(iii) Briefly explain why point E on Figure 1b is currently unobtainable.	(2)
(c) (i) A mixed economy attempts to solve the economic problem of	

- A what to produce, how to produce and when to produce
- **B** when to produce, how to produce and for whom to produce
- C what to produce, how to produce and for whom to produce
- **D** when to produce, how to produce and who should produce

(ii) In a mixed economy, the larger the private sector, the more efficient the economy will be in producing goods and services. Do you agree with this statement? Explain your reasons.			
	(6)		
(Total for Question 1	= 30 marks)		

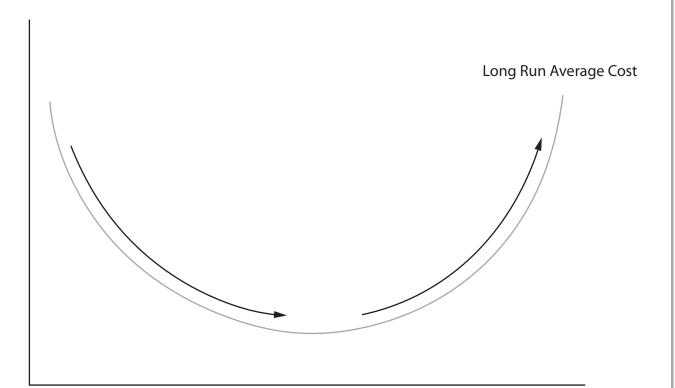

Figure 2

(a) (i) On Figure 2, label the axes and show where a firm would experience economies and diseconomies of scale.

(4)

(ii) With the aid of examples, explain the difference between internal and external economies of scale.

(4)

Aluco is a small American business manufacturing aluminium ladders. Table 2 shows its monthly costs.

Items	Cost in US\$
Rent	1 000
Loan repayment	500
Administration	1 500
Materials per ladder	45
Packaging per ladder	5
Labour per ladder	10

Table 2

(b) (i)	sing examples from Table 2 explain the difference between a variable cost and a fixed cost.				
		(4)			

made by the bu	siness. You are advise	a to snow your w	orking.	(4)
				, ,
(iii) Identify and exp	olain one factor that r	nay limit growth f	or a small busine	ess such
as Aluco.				(2)
				(2)

Like many businesses, Aluco operates in a highly competitive market. (iv) Assess the effectiveness of government policies to promote competition in a country of your choice.		
	(6)
